D2.4 Code and README

Repository: https://github.com/Nuha-Alodan/inshallah-phase1 Folder phase2

D2.1 data (396 MB, too large for GitHub):
https://drive.google.com/file/d/1wJbdsxksV2r_piTCvYuox2JU4MDstBob/view?usp=drive_link

Files in the repository (folder phase2)

File	Content
README.md	Run steps, file placement, expected numbers and licences
code/inshallah_phase1_phase2_colab.ipynb	Clean notebook to run
code/inshallah_phase1_phase2_executed.ipynb	Same notebook with its outputs
data/D2.2_annotation_sample.csv	D2.2: 1,000 rows for Phase 3
data/D2.2_sampling_weights.csv	Sampling weights of the strata
manual/	Reviewed sheets read by the notebook (50-row check, 100-row check, candidates, quotation check)
reports/phase2/	All tables used in the D2.3 report
D2.3_Corpus_Report.pdf	D2.3 report

Where to place the files

The notebook downloads the sources itself. To reuse files you already have, place them under the project folder as follows:

File	Folder
SFC-mini 0.txt … 62.txt	data/raw/sfc_mini/
Gulf tweets arab_gen_twitter.csv	data/raw/gulf_tweets/
SADA train.csv, valid.csv, test.csv	data/raw/sada/
Tanzil quran-simple-clean.txt	data/raw/tanzil/
All files from manual/ in this folder	manual/

How to reproduce D2.2

1. Open https://colab.research.google.com, choose File → Upload notebook and select code/inshallah_phase1_phase2_colab.ipynb.
2. The notebook saves its work in Google Drive (MyDrive/inshallah_project). If Drive does not mount, set USE_DRIVE = False in cell A4; the folder is then /content/inshallah_project.
3. Copy all files from manual/ into the manual/ folder of that project folder before running Step 4.
4. For SADA, add KAGGLE_USERNAME and KAGGLE_KEY in the Secrets panel.
5. Choose Runtime → Run all. If package installation asks for a restart, restart and run all again.
6. The cells run in this order: setup and CAMeL Tools; source download (SFC-mini, Gulf tweets, SADA version 23, Tanzil); extraction; cleaning and duplicate removal; Step 4 (11 columns and quotation flags); Step 5 (50-row check); Step 6 (100-row check); Step 7 (sampling); automatic checks; Step 8 (report numbers); download.

With the same sources, manual sheets, and seed 2026, the notebook writes D2.1_master_collection.csv, D2.1_provenance.csv, D2.2_annotation_sample.csv, D2.2_sampling_weights.csv, and the tables in reports/phase2/.

Expected numbers

Source	Found	After duplicates	After all filters (D2.1)	In D2.2
SFC-mini	519,971	508,010	469,943	300
SADA	9,655	9,627	9,114	350
Gulf tweets	1,036	926	885	350
Total	530,662	518,563	479,942	1,000
